

PLAIN AND REINFORCED CONCRETE

CHAPTER 1 Materials For Cement Concrete

- 1.1 Introductory
- 1.2 Cement
- 1.3 Tests and Specifications of Portland Cement
- 1.4 Rapid Hardening or High Early Strength Cement
- 1.5 Low Heat Cement
- 1.6 High Alumina Cement
- 1.7 Quick Setting Cement
- 1.8 Expanding Cement
- 1.9 White Portland Cement
- 1.10 Coloured Cements
- 1.11 Water Proffed Portland Cement
- 1.12 Masonry Cement
- 1.13 Portland Blast-Furnace Cement
- 1.14 Super Sulphated Cement
- 1.15 Sulphate Resisting Cement
- 1.16 Air Entraining Portland Cement
- 1.17 Pozzuolanic Cement
- 1.18 Sand Cement
- 1.19 Storing of Cement
- 1.20 Aggregates
- 1.21 Water
- 1.22 Admixtures
- Exercises

CHAPTER 2 Preparation and Properties of Concrete

- 2.1 General
- 2.2 Measurement of Materials
- 2.3 Factors Governing Proportioning of Concrete Mixes
- 2.4 Durability of Concrete
- 2.5 Workability of Concrete
- 2.6 Methods of Proportioning Concrete Mixes
- 2.7 Estimate of Quantities
- 2.8 Mixing and Placing of Concrete
- 2.9 Curing of Concrete and Removal of Forms
- 2.10 Factors Influencing the Strength of Concrete
- 2.11 Effect of Temperature on Concrete
- 2.12 Shrinkage of Concrete
- 2.13 Water Proof Concrete
- 2.14 Light Weight Concrete
- 2.15 Vaccum Concrete
- 2.16 Prestressed Concrete
- 2.17 Pre-packed Concrete
- 2.18 High Early Strength Concrete
- 2.19 Concrete in Sea Water
- 2.20 Concrete in Alkali Soils and Alkaline Water
- 2.21 Effect of Calcium Chloride on Concrete
- 2.22 Action of Chemical & Other Forms of Weathering
- 2.23 Surface Protection of Concrete

- 2.24 Heat Evolution of Cement & Mass Concrete
- 2.25 Surface Finishing
- 2.26 Construction Joints
- 2.27 Expansion & Construction Joints
- 2.28 Guniting of Concrete & Mortars
- 2.29 Young's of Modulus of Elasticity of Concrete
- 2.30 Working stresses in Concrete
- 2.31 Tests for concrete

Exercises

CHAPTER 3 Reinforcing Material

- 3.1 Choice of Materials
- 3.2 Reinforcing Steel
- 3.3 Deformed Bars
- 3.4 Twisted Bars
- 3.5 Specifications
- 3.6 Permissible stresses in Reinforcement
- 3.7 Workmanship

Exercises

CHAPTER 4 Theory of Reinforced Concrete Beams

- 4.1 History
- 4.2 Distribution of Direct Stresses in R.C. Sections
- 4.3 Design of Rectangular Beams for Bending Moment
- 4.4 Balanced Design
- 4.5 Strength of a Rectangular Beam
- 4.6 Mode of Failure of a R.C. Beam
- 4.7 Types of Problems

Examples
Exercises

CHAPTER 5 Shear and Bond Stresses in Beams

- 5.1 Shear Stresses in Beams
- 5.2 Diagonal Tension
- 5.3 Failure of a Beam Due to Diagonal Tension
- 5.4 Provision of Reinforcement Against Diagonal Tension
- 5.5 Permissible Shear Stress in Concrete Example
- 5.6 Bond
- 5.7 Intensity of Bond Stress in a Beam
- 5.8 Length of Embedment or Overlap of Steel Bars
- 5.9 Permissible Bond Stress

Examples
Exercises

CHAPTER 6 Doubly Reinforced Beams

- 6.1 Rectangular Beams With Compression
- 6.2 Testing a Doubly Reinforced Beam Examples
- 6.3 Steel Beam Theory
- 6.4 Types of Problems

6.5 Shear and Bond Stresses in Doubly Reinforced Beams

Examples

Exercises

CHAPTER 7 T-Beams

7.1 T-Beams

7.2 Design of T-Beams

7.3 Moment of Resistance of a T-Beam

Examples

Exercises

CHAPTER 8 Special Problems

8.1 Beams of Varying Depth

8.2 Temperature Stresses

8.3 Composite Beams

8.4 Deflection of Beams

Examples

Exercises

CHAPTER 9 Design of Beams and Slabs

9.1 Design Rules

9.2 Design Examples on Beam

9.3 Slab for a Culvert

9.4 Beam

9.5 Cantilever

9.6 Lintel

9.7 Verandah Lintel

9.8 Verandah Roof

9.9 Doubly Reinforced Beam

9.10 T-Beam Roof

9.11 Beam and Slab Floor

9.12 Cantilever Balcony-Example

9.13 Inverted T-Beam Roof-Example

9.14 Hollow Tile Roof-Example

9.15 Reinforced Brick Work-Example

9.16 Stair Cases-Example

Exercises

CHAPTER 10 Slabs

10.1 Slabs Supported on Four Edges

10.2 Slabs with Edges Simply Supported, Corners not Held Down

10.3 Slabs with Edges Simply Supported, Corners Held Down

10.4 Slab with Edges Fixed or Continuous

10.5 Non Rectangular Slabs

10.6 Circular Slabs Example

10.7 Flat Slabs Supported on Columns

10.8 Nature of Stresses in a Flat Slab

10.9 Reinforcement in flat Slab

10.10 Shear and Bond in Flat Slabs

10.11 Bending Effect at Columns in Flat Slabs
10.12 Openings in Panels of Flat Slabs
10.13 Partition Walls on Flat Slabs Examples
10.14 Reinforced Brick Slabs
Exercises

CHAPTER 11 Columns

11.1 General
11.2 Placement of Reinforcement
11.3 Stresses in a R.C. Column
11.4 General Requirements of the Design of Columns
Longitudinal reinforcement
Transverse Reinforcement
11.5 Long Columns
11.6 Economy in Column Design
11.7 Structural Steel Column Embedded in Concrete
11.8 Eccentrically Loaded Columns Examples
11.9 Reinforced Concrete Walls
Exercises

CHAPTER 12 Foundations

12.1 General
12.2 Purpose of Foundation
12.3 Necessity of R.C. Foundation
12.4 Action of a Footing
12.5 Footing for isolated Square Column
12.6 Sloped and stepped footings
12.7 Rectangular Footings
12.8 Round or Octagonal Column
12.9 Increase in Bearing Pressure Examples
12.10 Eccentrically Loaded Footings
12.11 Combined Footings Examples
12.12 Foundations With Strap Beams
12.13 Pile Foundation
12.14 Pile Cap Examples
12.15 Raft Foundation
Exercises

CHAPTER 13 Retaining Walls

13.1 General
13.2 Stability of Retaining Walls
13.3 Base Width
13.4 T-Shaped R.C. Retaining Wall
13.5 Counterfort Type Retaining Wall
13.6 Back Anchoring of Retaining
Exercises

CHAPTER 14 Direct and Bending Stresses

14.1 General

14.2 Compression and Bending Case I
14.3 Case II
14.4 Case III
14.5 Tension and Bending Case IV
14.6 Case V
14.7 Case VI
Examples
14.8 Analysis of Stresses in Sections of Irregular Shapes
14.9 Design of Structures Subjected to Combined Stresses
Examples
14.10 Graphical Determination of Neutral axis
Exercises

CHAPTER 15 Domes

15.1 Domes
15.2 Nature of Stresses
15.3 Analysis of Stresses
15.4 Wind and Other Occasional Loads
15.5 Design Requirements-Example
Exercises

CHAPTER 16 Liquid Retaining Structures

16.1 General
16.2 Over-head Circular Tanks
16.3 Rectangular Tanks
16.4 R.C. Pipes
Exercises

CHAPTER 17 Form-Work

17.1 General
17.2 Design Load on Form Work
17.3 Column Shuttering-Example
17.4 Forms for Beam and Slab Floor-Example
17.5 Forms for Wall-Example
17.6 Forms for Retaining Walls
17.7 Forms for Stair Cases
17.8 Forms for Circular Sewers and Culverts
17.9 Forms for Arch Culverts and Bridges
17.10 Forms for a Circular Tank

CHAPTER 18 Ultimate Load Theory

18.1 General
18.2 Maximum Moment at Failure of Beams
18.3 Whitney's Theory
Examples
18.4 I.S. Code Provisions-Examples
18.5 Ultimate Strength of R.C. Slabs-yield Line Theory-Examples
