

## **THEORY AND ANALYSIS OF STRUCTURES VOLUME II**

### **CHAPTER 1 Rolling Loads**

- 1.1 Introductory
- 1.2 A single Point Load
- 1.3 Uniformly Distributed Load Longer than the Span
- 1.4 Uniformly Distributed Load Shorter than the Span
- 1.5 Several Point Loads
- 1.6 Graphical Method
- 1.7 Equivalent Uniformly Distributed Load
- 1.8 Combined Shear Force Due to Dead and Moving Loads
- Problems

### **CHAPTER 2 Influence Lines for Simple Beams and Trusses**

- 2.1 Introductory
- 2.2 Simply Supported Beams-Influence Lines for Shear Force and Bending Moment
- 2.3 Use of Influence Lines
- 2.4 Influence Lines for Trusses with Horizontal Chords and Single Web Systems
- 2.5 Counterbraces
- 2.6 Wind Bracing in Bridges
- 2.7 Influence Lines for Stresses in Trusses
- Problems

### **CHAPTER 3 Slopes and Deflections of Simple Beams and Frames**

- 3.1 Introductory
- 3.2 Unit Load Method for Deflection
- 3.3 Unit Load Method for Slope
- 3.4 Moment Area Method
- 3.5 Conjugate Beam Method
- Problems

### **CHAPTER 4 Statically Indeterminate Beams and Frames**

- 4.1 Introduction
- 4.2 Analysis of Statically Indeterminate Beams by the Method of Consistent Deformations
- 4.3 Reactions due to Yielding of Supports
- 4.4 Analysis of Simple Frames
- 4.5 Theorem of Three Moments
- Problems

### **CHAPTER 5 Slope-Deflection, Deformation Distribution and Kani's Methods**

- 5.1 Introductory
- 5.2 Slope Deflection Equations
- 5.3 Frames with Joint Movements
- 5.4 Deformation Distribution Method
- 5.5 Kani's Method for Frames without Joint Movements
- 5.6 Frames with Joint Movements
- Problems

## **CHAPTER 6 Moment Distribution Method**

- 6.1 Introductory
- 6.2 Fundamental Propositions
- 6.3 Method of Moment Distribution
- 6.4 Sinking of Supports
- 6.5 Continuous Beams Rigidly Connected to Columns
- 6.6 Frames with Side-Sway
- 6.7 Short Cuts in Moment Distribution
- Problems

## **CHAPTER 7 The Column Analogy Method**

- 7.1 Introduction
- 7.2 Column Analogy Method for Fixed Beams of Uniform Section
- 7.3 Stiffness and Carry-Over Factors for Members of Uniform Section
- 7.4 Straight Members with Variable Cross Section
- 7.5 Analysis of Portal Frames with an Axis of Symmetry
- 7.6 Analysis of Closed Frames with an Axis of Symmetry
- 7.7 Frames with Hinged Supports
- 7.8 Movement of Supports in Symmetrical Frames
- 7.9 Analysis of Unsymmetrical Frames
- Problems

## **CHAPTER 8 Strain Energy Method**

- 8.1 Introduction
- 8.2 Elastic Strain Energy
- 8.3 Preliminary Applications
- 8.4 Maxwell-Betti Reciprocal Theorem
- 8.5 Castigliano's First Theorem
- 8.6 Castigliano's Second Theorem
- 8.7 Virtual Work
- 8.8 Muller-Berslau Principle
- 8.9 Applications of Energy Methods
- Problems

## **CHAPTER 9 Deflection of Triangulated Frames**

- 9.1 Introduction
- 9.2 General Case
- 9.3 Deflection Due to Loads
- 9.4 Deflection Due to Temperature Changes
- 9.5 Deflection Due to Looseness of Joints or Errors in Length of Members or Lack of Fit
- 9.6 Angular Rotation of Members of a Truss
- 9.7 Graphical Method-Williot-Mohr Diagrams
- 9.8 Angular Rotation of Members from Williot Diagram
- 9.9 Reciprocal Theorem Proved for Trusses
- 9.10 Use of the First Theorem of Castigliano's
- Problems

## **CHAPTER 10 Redundant Frames and Some Elastic Combinations**

- 10.1 Introduction
- 10.2 Trusses with One Redundant Member
- 10.3 Stresses Due to Lack of Fit
- 10.4 Frames with More than One Degree of Redundancy
- 10.5 Second Theorem of Castigliano
- 10.6 Rusting of Rollers and Temperature Stresses
- 10.7 Continuous or Arched Trusses
- 10.8 Deflection of Redundant Frames
- 10.9 Elastic Combinations
- 10.10 Trussed Beams
- Problems

## **CHAPTER 11 Suspension Bridges**

- 11.1 Introduction
- 11.2 Suspension Bridge Elements
- 11.3 The Cable to Carry Concentrated Loads
- 11.4 The Cable with Continuous Loading
- 11.5 Length of Cable
- 11.6 Deformations of the parabolic Cable
- 11.7 Anchor Cable
- 11.8 Moving Loads on Suspension Bridges
- 11.9 Bridges with Three Hinged Stiffening Girders
- 11.10 Bridges with Two Hinged Stiffening Girders
