

WELLS & CAISSONS

CHAPTER 1 Introduction

- 1.1 History
- 1.2 Substructure
 - 12.1 The pier
 - 12.2 The foundations
- 1.3 Open Foundations
- 1.4 Pile Foundations
 - 14.1 Different types of pile foundations
 - 14.2 Benoto piles
 - 14.3 Housner-wise piles
 - 14.4 Under-reamed piles
- 1.5 Well Foundations
- 1.6 Advantages of Well Foundations
 - 16.1 Well foundations vs piles foundations
 - 16.2 Well foundations vs open foundations

CHAPTER 2 Types of Well Foundation

- 2.1 Introduction
 - 2.1.1 Circular well
 - 2.1.2 Double D well
 - 2.1.3 Double octagonal well
 - 2.1.4 Rectangular well
 - 2.1.5 Twin circular well
 - 2.1.6 Wells with multiple dredge holes
- 2.2 Ordinary Wells and Caissons

CHAPTER 3 Depth of Well Foundations

- 3.1 Introduction
 - 3.1.1 Normal scour in the river
 - 3.1.2 Local scour around the piers
 - 3.1.3 Grip below the maximum scour
- 3.2 Depth of Wells in Rivers Having Non-Scourable Material

CHAPTER 4 The Bearing Capacity

- 4.1 Introduction
- 4.2 Bearing Capacity of Rocks
- 4.3 Bearing Capacity of Soils
- 4.4 The Standard Penetration Test
- 4.5 Determination of Safe Bearing Capacity
 - 4.5.1 Sampling
 - 4.5.2 Shear failure consideration
 - 4.5.3 Allowable bearing pressure under well foundations
 - 4.5.4 Plate load consideration
- 4.6 Lateral Load Resistance of Well Foundations
 - 4.6.1 Check for soil pressures by elastic theory
 - 4.6.2 Derivation of equation used in elastic theory
 - 4.6.3 Check for ultimate soil resistance

- 4.6.4 Derivation of equations used in plastic theory
- 4.7 Special Points Regarding Bearing Capacity
 - 4.7.1 Wells resting on sand
 - 4.7.2 Wells resting on clay

CHAPTER 5 Design of Wells

- 5.1 Introduction
- 5.2 Collection of Data
- 5.3 Preliminary Design of Well
- 5.4 Forces Acting on Wells
- 5.5 Combination of Loads and Permissible Increase in Working Stresses
 - 5.5.1 Working stresses
 - 5.5.2 Foundation pressures
- 5.6 Design of the Cutting Edge and the Well Curb
 - 5.6.1 Cutting edges and curbs for well on rock
- 5.7 Design of Steining
 - 5.7.1 Forces during open sinking
 - 5.7.2 Forces during pneumatic sinking
- 5.8 The Corbel Course
- 5.9 The Bottom Plug
- 5.10 The Sand Filling
- 5.11 The Top Plug
- 5.12 The Well Cap
- 5.13 Design Examples

CHAPTER 6 Construction of Well Foundations

- 6.1 Introduction
- 6.2 Pitching the Well Curb
- 6.3 Masonry in Steining
 - 6.3.1 Concrete mix
- 6.4 Treatment of the Steining to Reduce Leakage
- 6.5 Wells in Water
- 6.6 Making the Island
- 6.7 Assembly and Launching of Caissons
- 6.8 Grounding of the Caissons

CHAPTER 7 Open Sinking of Wells

- 7.1 Introduction
- 7.2 Equipments for Open Sinking
 - 7.2.1 Grabs or dredgers
 - 7.2.2 Hoists
 - 7.2.3 Straight chisels
 - 7.2.4 Undercutting chisels
 - 7.2.5 Pumps
 - 7.2.6 Air and Water jets
 - 7.2.7 Equipments for the electric detonation of explosives
- 7.3 Open Dredging
- 7.4 Precautions During Well Sinking
- 7.5 Removal of Snags
- 7.6 Open Sinking of Wells Through Clay

- 7.7 Open Sinking of Wells Through Rock
- 7.8 Special Problems of Open Sinking
 - 7.8.1 Quick sand conditions
 - 7.8.2 Removal of obstructions with the help of divers
 - 7.8.3 Diving dress and the helmet
- 7.9 Tilts and Shifts
 - 7.9.1 Precautions to avoid tilts and shifts
 - 7.9.2 Record of tilts and shifts
 - 7.9.3 Corrections of tilts and shifts

CHAPTER 8 Pneumatic Sinking of Wells

- 8.1 Introduction
- 8.2 Need of pneumatic Sinking
 - 8.2.1 Limitations
- 8.3 Plant Required for Pneumatic Sinking
 - 8.3.1 The air locks
 - 8.3.2 Accessories and fittings
- 8.4 Physiological Effects of Compressed Air
- 8.5 Caisson Sickness-Causes, Prevention and Cure
 - 8.5.1 Compression
 - 8.5.2 Hours of working and decompression
 - 8.5.3 Other precautions at the time of decompression
 - 8.5.4 Ventilation inside the well
 - 8.5.5 Temperature and humidity
 - 8.5.6 Treatment of Caisson sickness
- 8.6 Excavating and Sinking
 - 8.6.1 The sinking effort-example
 - 8.6.2 Blowing of the sand
- 8.7 Correction of Tilt
- 8.8 Removal of Excavated Material

CHAPTER 9 Pugging, Sand Filling and Casting

- 9.1 The Bottom Plug
- 9.2 Concreting
- 9.3 Sand Filling
- 9.4 The Top Plug
- 9.5 The Well Cap
